Re: The American Chemical Service Site

Dear Mr. Burton:

I have reviewed the following documents for the above mentioned site:

1. The Health and Safety Plan; and
2. The Work Plan

Both documents were approved for their quality of work, although there remains to be typo corrections made and a few statements to be addressed.

The following pinpoints the pages and explanations of what needs to be looked at regarding typo errors.

PAGE NUMBER

EXPLANATION

2-3 of 11	Mispelling of the word to.
2-4 of 11	One word too many used. There should be (at or in) used in the sentence.
2-7 of 11	Mispelling of the word toluene.
2-11 of 11	The word "previously" should be used instead of "previous". A typo error leaving the letter (e) astray in a sentence

Other explanations include:

4.2.5

TECHNICAL MEMORANDA

It should be stated that the technical memoranda will be sent to the U.S. EPA and the Indiana State Board of Health for review and approval.

2.3

Contaminant Migration and
Environmental Health Effects

It should state what the letters
SWDA stand for.

2.32

Potential Receptors

It should be stated what creek flows
through the marsh west of the ACS property?

p. 2-10 of 11

A sentence has been left incomplete.

Pending these corrections, both documents should be considered finalized.

If there are any further questions, please feel free to contact me.

Sincerely,

Rodney G. Gaither
Remedial Project Manager
